Minister Launches Bribin II Clean Water Project

Friday, 12 March, 2010 | 18:05 WIB

TEMPO Interactive, Gunung Kidul: Public Works Minister Joko Kirmanto yesterday officially launched the Bribin II underground river potable water project in Gunung Kidul. Potable water is obtained 104 meter below the Sindon underground river in Dadapayu, Semanu, Gunung Kdul. The project is expected to meet potable water needs for 75.000 people in Gunung Kidul. "Gunung Kidul residents who are often short of water can now enjoy water from the earth," Joko said.

Drawing the underground water used five pipes able to lift 100 liter of water per second. The project cost Rp 35 billion from the State Budget as well as the Yogyakarta and Gunung Kidul Regional Budget, amounting to 1,4 million euro. Joko also inaugurated a number of infrastructure projects in Yogyakarta valued at a total of Rp 205 billion. They include the Embung Tambakboyo, Sapon Dam, and sediment control dam in Kuning River in Wedomartani, Sleman.
